The Start screen is all you

Each tile on Start is connected to a person, app, website, folder, playlist, or whatever else is important to you. Pin as many tiles to Start as you like and move them around so it's just the way you want it. This isn't the usual wall of static icons: Tiles animate with the latest information. Status updates, weather forecasts, Tweets, and more you'll see live updates before you even open a single app.

See something, share something

Your photos, websites, that funny video you just saw: Pretty much anything you're looking at, you can share with others. Instantly. There's no need to interrupt what you're doing, copy what you want to share, open another app, and paste it in. Just swipe in from the right and tap or click Share to immediately send it in email or post it to Facebook.
